LUNAR CONNECTION 2027

OFFICIAL USER GUIDE

Lunar calendar, Moon phases, zodiac ingresses, Lunar Journal, and Monthly Planning combined in a digital tool for 2027.

How to use this guide

Follow the sections in first-use order or go directly to the feature you need. Button names correspond to the English interface.

Preparation edition — based on features currently implemented in the application. Purchase instructions, access URL, and definitive installation steps will be added when these processes are completed.

1. Exploring the home page

The home page contains the The Moon Today panel, Annual Calendar, Upcoming Movements, and a Lunar Journal note field. Below are six links: Annual Calendar, Moon Phases, Zodiac Ingresses, Lunar Journal, Planning, and Settings.

1. Open the application using the address supplied with your access materials.
2. Choose PT or EN in the header to switch languages.
3. Select a section. On internal pages, use Back to Home to return.

2. Annual Calendar

1. Choose a month using the side list or the arrows next to the month name.
2. Select a calendar day to view information for that date.
3. Review the lunar movements and tropical zodiac position panels.

The calendar is designed specifically for 2027. Astronomical information is displayed in the selected time zone. Some ingress times are marked in the application as technical previews pending independent review.

3. Moon Phases

1. Open Moon Phases.
2. Select a month in 2027.
3. Choose your preferred time zone.
4. Review the dates and times of the four principal lunar phases.

The principal phases are based on the U.S. Naval Observatory's 2027 table, with times converted to the chosen time zone.

01 | Home page

LUNAR CONNECTION 2027

Find the six modules at the bottom of the page.

Select a module card to open the corresponding feature.

ACTUAL APPLICATION SCREENSHOT · APPROVED PREVIEW

4. Zodiac Ingresses

1. Open Zodiac Ingresses.

2. Select the month and time zone.

3. Read the sequence of the Moon's entries into tropical zodiac signs.

Changing the time zone may change the calendar date shown. Ingress times are preliminary and subject to independent astronomical verification.

02 | Moon Phases

LUNAR CONNECTION 2027

Select the month and time zone.

Check the four main phases and their displayed times.

ACTUAL APPLICATION SCREENSHOT · APPROVED PREVIEW

03 | Zodiac Ingresses

LUNAR CONNECTION 2027

Select the month and time zone.

Review the entries; times remain subject to the stated audit.

ACTUAL APPLICATION SCREENSHOT · APPROVED PREVIEW

5. Lunar Journal

The Lunar Journal lets you record observations, intentions, and reflections by date, from January 1 to December 31, 2027.

1. Open Lunar Journal.
2. Under Choose date, select the day you wish to record.
3. Write in the My notes field.
4. Check the save-status message. Your entry is stored locally in this browser.
5. To revisit an entry, select its date again.

The Journal also provides backup export, restore, and print or save-as-PDF options. Local storage is not a substitute for an external backup.

6. Lunar Planning

Planning stores information separately for each month of 2027.

1. Open Planning and select the month.
2. Fill in Monthly intentions, Priorities and focus, and Reflections and lessons learned.
3. Under New task, type an item and press Add task.
4. Check a task to mark it complete, or use Delete to remove it.
5. Switch months as needed. Each month's information is stored separately in this browser.

Planning does not automatically sync across devices.

7. Settings and time zone

1. Open Settings.

04 | Lunar Journal

LUNAR CONNECTION 2027

Select a date in 2027 and write your notes.

Export backups regularly to protect your entries.

ACTUAL APPLICATION SCREENSHOT · APPROVED PREVIEW

05 | Lunar Planning

LUNAR CONNECTION 2027

Choose a month and complete intentions, priorities and reflections.

Add tasks and export a full backup.

ACTUAL APPLICATION SCREENSHOT · APPROVED PREVIEW

2. Under Time zone, select Brasília/São Paulo, New York, Lisbon, London, or UTC.
3. Check the current region shown on the page.

The time zone changes the displayed times of lunar events. It does not change the content of your notes.

8. Full backup — essential

A full backup combines Lunar Journal notes and Monthly Planning data in a single JSON file.

1. Open Settings or Planning.
2. Press Export full backup.
3. Store conexao-lunar-2027-backup.json in a safe location, preferably outside the device.
4. Repeat the export after significant changes to your records.

Important: printing a page or saving a PDF is not a full backup. The JSON file is used to restore data.

9. Restoring records

1. On the destination device or browser, open the application and go to Settings.
2. Choose Restore backup and select your exported JSON file.
3. Read the confirmation message before proceeding.
4. Check the Journal and Planning sections after restoration.

Important: existing entries for the same dates or months may be replaced during restoration. Export a backup of your current data before importing.

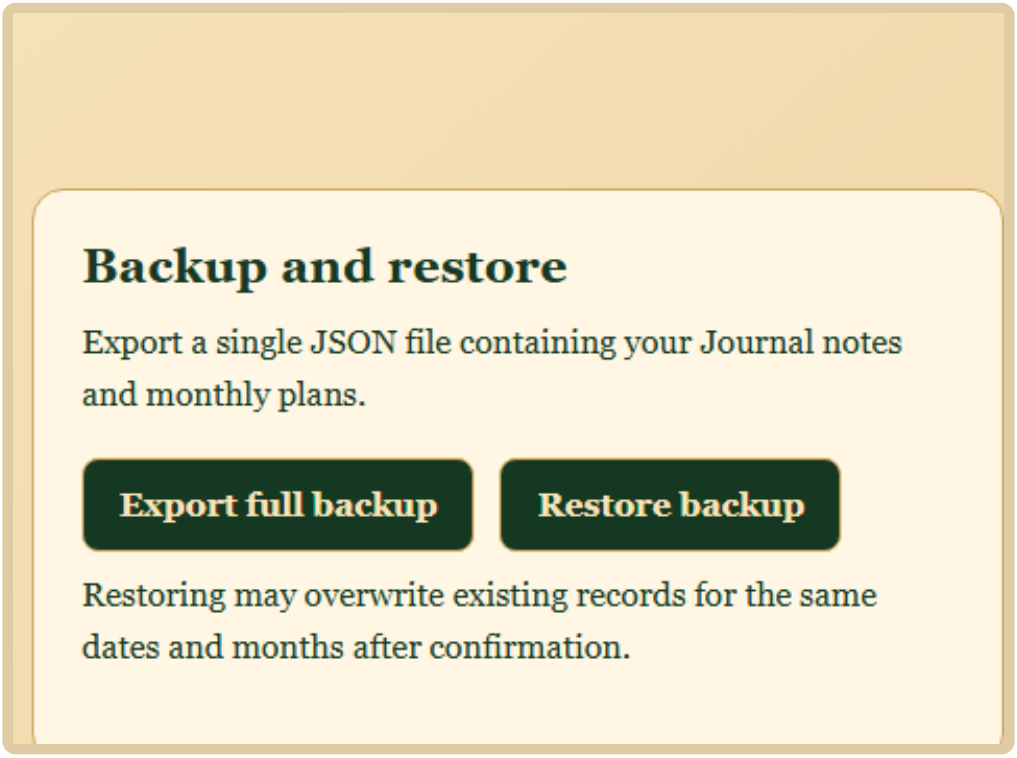

10. Using a computer and a phone

You can open the application on different devices, but records do not sync automatically. To transfer notes and plans, export a full backup on the first device and restore it on the second.

If you make changes on both devices, you must manage backups manually to avoid overwriting newer records.

06 | Backup and restore

LUNAR CONNECTION 2027

1. Select «Export full backup».

2. Keep the JSON file safe. 3. Select «Restore backup» to import.

WARNING: restoring may overwrite existing records.

11. Privacy and data care

Notes and plans are stored in the browser and device in use, not in a personal online account. Clearing browser data, using private browsing, changing devices, or uninstalling the app may make entries inaccessible.

Recommendation: keep periodic JSON copies in a secure folder and a second storage location.

12. Printing and PDF

1. Open the page you wish to print.
2. Use the print feature on the page or in your browser.
3. In the print dialog, choose Save as PDF to create a file, when available.

A printed PDF is useful for reading and archiving, but does not replace the JSON backup used to restore data.

13. Installation and offline access

The Settings page anticipates installing Lunar Connection 2027 as an app. In the technical version reviewed for this guide, installation is still marked as pending activation and testing.

Therefore, do not assume offline use is guaranteed until the installable version has been completed and verified. Browser-based access depends on the browser's access and storage conditions.

14. Frequently asked questions

Can I use more than one device?
Yes, but records remain separate. Transfer them using JSON backup export and restoration.

Will changing to English erase my notes?
The PT/EN switch changes the interface. Your notes remain linked to dates in local storage.

Does the application work for 2028?
No. The calendar, Journal, and Planning are designed for 2027.

If I clear browser data, can I recover my notes?
Only if you have a valid backup or another copy.

15. Before you begin

Choose your language and time zone, explore the calendar, write your first entry, and try adding a task. Then export a test backup and store it safely.
